## PERSONAL SKILLS

---

Mother language: Hungarian

Foreign languages: English (C1)

Driving license type: B, A

Other skills: I love to work in groups. I have a good sense to solve problems and I am hardworking. In my opinion I am quite maximalist and also very open minded. I know all Office and most Adobe programs. Besides I know the C# and Java programming languages, also learned some SQL too. I had the chance to develop a game in a small group during my studies. We used C# to code it. With this game we became third in the University's coding competition. During my intern works I had the opportunity to try myself at different jobs. I worked as a manual tester, incident manager, and also as a software engineer too. During these times I learned about agile workflow, different SCRUM methods, and agile software development. I got real experience in .Net, C#, and API development. I learnt to use GitHub in action. My debugging skills improved a lot during my internship program. I had some experience with Javascript and Angular too.
